Castle Creations Acquires Berg Enterprises

Berg receivers now made in the USA

Wellsville, KS, December 15, 2004 - Castle Creations is pleased to announce the acquisition of Berg Enterprises. As of December 1, 2004, manufacturing and distribution rights for the Berg receiver line belong to Castle Creations. With the help of Peter Berg (original designer), production of the newly revised line of receivers will be transferred to Castle Creations surface mount production facility in Wellsville KS. Berg receivers will now be proudly made in the USA for even more reliability and stability. Actual production will start in July of 2005, and product will be available to Castle Creations' dealers in July of 2005. The planned models include an updated lighter and smaller micro 4 channel, an updated 7 channel as an improvement to the popular Berg 6, and an all new 9 channel model. All models are microprocessor controlled. and represent the absolute state-of-the-art in receivers.

All Berg receivers feature True Digital Signal Processing (TDSP) as well as Transmitter Signal Recognition (TSR) technology, and represent the most selective and active signal processing available in any receiver. The results speak for themselves - full range, a unique "feel" that must be experienced to believe and performance that can only be described as 100% solid.

December 15, 2004.

As a privately held company, Castle Creations is a leader in speed control technology for the R/C hobby industry. All Castle Creations' controllers are designed and manufactured in the U.S.
