Introducing the CM-20 Brushless Motor Line

Wellsville, KS, February 25, 2005 - Castle Creations is pleased to announce the release of its new CM-20 brushless motor line. These new motors have proven themselves in the tough environment of small R/C cars and are now available for 1/18th scale cars separately, as well as for use in R/C aircraft. The CM-20 line features top quality Neodymium magnets, oversize ABEC-1 ball bearings, hard anodized cases, and extra thick end-bells for secure mounting and extra durability. They also come backed with the industry standard customer service and support. Castle Creations continues to lead the entire hobby market with.

Airplanes, helicopters, or 1/18th scale cars - the CM-20 motors can do it all! The Castle Creations CM-20 motors come in 5 different Kv's: 3400, 4200, 5400, 6800, and 8000. Use the first three for geared airplane use, or extra-long runtimes in 1/18th scale vehicles. The last two are made exclusively for simply ridiculous speeds in 1/18th scale cars and trucks. Check the Castle Creations website (www.castlecreations.com) for full specifications and suggested uses for different power systems.
February 25, 2005.

As a privately held company, Castle Creations is a leader in speed control technology for the R/C hobby industry. All Castle Creations' controllers are designed and manufactured in the U.S.
