HYDRA CONTROLS THE WAVES

Olathe, KS, April 12, 2007. Castle Creations knows that boaters crave more power. Castle's Barracuda line already owns the record books, but we have come up with a whole new way to put the power to the water – **The new HYDRA™ line of watercooled brushless speed controls for marine applications.**

The Hydras use new FETS that offer 50% less resistance than those used in the original Castle Barracudas – that means cooler controllers at unbelievable power levels. We've also added water cooling heat sinks to take these controls to even more incredible power levels.

HYDRA 120 packs a lot of punch. Castle puts 10 gauge cables on them to handle the amps.

Hydra 240 is a beast. Our engineers put twice the cables on this monster in order to handle Two Hundred and Forty amps!

HYDRA™ 120 SPECS	
Part Number:	Hydra 120
Height:	0.6" (14.5mm)
Length:	3" (76.5mm)
Width:	1.6" (40mm)
Weight:	3.2 oz (93 grams)
Resistance:	0.00043 ohms
Max Amps:	120
Max Volts:	25 volts
Cells w/BEC:	5-12 NiCad / NiMh 3S LiPo
Cells no BEC:	5-20 NiCad / NiMh 6S LiPo
Reversible:	Yes
MSRP:	\$259.95

HYDRA™ 240 SPECS	
Part Number:	Hydra 240
Height:	1" (25.4mm)
Length:	3" (76.5mm)
Width:	1.6" (40mm)
Weight:	6.2 ozs. (178 grams)
Resistance:	0.00022 ohms
Max Amps:	240
Max Volts:	25 volts
Cells w/BEC:	5-12 NiCad / NiMh 3S LiPo
Cells no BEC:	5-20 NiCad / NiMh 6S LiPo
Reversible:	Yes
MSRP:	\$299.95

**All Castle speed controls and receivers are assembled in the USA from foreign and domestic components.*
