Phoenix High Voltage Controllers

New Phoenix HV series of controllers!

Wellsville, KS, May 10, 2005 - Castle Creations is pleased to introduce the new line of Phoenix High Voltage controllers. The Phoenix HV series includes 45 amp, 80 amp, and 110 amp models, to cover all types of high voltage flying from medium sized sport models, all the way up to 40% airplanes and very large helicopters. The eagerly awaited Phoenix HV series lets you take full advantage of the efficiency and higher power levels available from high voltage power systems. Our innovative designs give you a cool running, affordable, and very reliable solution to all of your high voltage applications. With the ability to use up to 12 Lithium Polymer cells in series, or up to 35 NiCad or NiMh cells, all three models represent the peak of technology in the brushless controller market, and sets a new standard of performance and reliability in their class.

The Phoenix HV series is capable of up to 50 volts of input, and the 110 amp model handles over 5 KILOWATTS of power (that's over 7hp)! The Phoenix HV series also features dual opto couplers, Lithium Polymer safe cutoff voltages, and all the programming flexibility of the Phoenix line, including compatibility with the PHX-Link USB programmer for on-screen PC programming changes and updates.
May 10, 2005

As a privately held company, Castle Creations is a leader in speed control technology for the R/C hobby industry. All Castle Creations' controllers are designed and manufactured in the USA.
