

New Phoenix ICE150, ICE LITE 150 & ICE HV120 Now Shipping! (really)

Castle continues to expand the popular Phoenix ICE and Phoenix ICE HV lines with three new controllers arriving in Q2 2010. These controllers are sure to be a big hit with high power heli and aircraft customers.

All offer the advanced ICE data logging capabilities, including Current, Voltage, RPM, ESC Temp, and Power Consumption, along with the advanced programming capabilities that make the Castle lineup the top helicopter ESCs in the industry. All ICE and ICE HV controllers are Castle Link and Castle Field Link compatible for access to advanced settings. Castle's firmware excels at running the widest variety of inrunners and outrunners of any controller on the market.

Performance Specifications:

	Phoenix ICE 150	Phoenix ICE 150 LITE	Phoenix ICE HV 120
Max Volts in	8S LiPo (33.6 volts)	6S LiPo (25.2 volts)	12S (50.4 volts)
Max Continuous Amps	150 amps	150 amps	120 amps
Wattage	5,000+ watts	3,750+ watts	6,000+ watts
Switching BEC	5 amps max at full 8S input	5 amps max at full 6S input	NO BEC
Recommended Applications	EDF projects, 50cc class sport aerobats and scale planes. Electric helis from aggressive 500 class	High power air applications where space or weight are critical.	High Voltage EDF, aerobats and scale planes. Electric helis up to sport 700 class.

	to sport 700 class
