

PRODUCT USE WARNING

THE 2028-1700KV IS AN EXTREME MOTOR DESIGNED FOR EXPERIENCED USERS ONLY! Failure to abide by the information in this document can lead to dangerous motor, ESC and/or battery failures. Castle is not responsible for any damages incurred when using this product.

DO NOT RUN MOTOR TO FULL THROTTLE WITH NO LOAD, ESPECIALLY AT FULL VOLTAGE. THIS CAN LEAD TO ROTOR FAILURE AND POSSIBLY ESC AND/OR BATTERY FAILURE.

Continued on the other side.

Max voltage: This motor is rated up to 8s LiPo (33.6v) max.

Gearing: Start with conservative gearing (small pinion/large spur gear), particularly when running on 8s. Make sure ESC, motor and battery temperatures stay within maximum tolerances. It is not recommended to exceed 180°F on Castle ESCs and motors. If you have a data log enabled ESC, make sure your battery voltage, ESC current and ripple voltage are within acceptable limits.

Warranty: This motor is balanced and tested during manufacture and is warranted free from defects in materials and workmanship for 30 days following the original date of purchase. Due to the abusive nature of drag and speed run setups, Castle is not liable for incidental or consequential damages to other equipment such as ESCs and batteries when using this motor and is not responsible for failures resulting from abuse, improper installation, misapplication or alteration.

Should you have any questions about your product, its use or setup, please contact Castle Technical Support.
