	The SIDEWINDER 4 SPORT 1:10 SCALE ESC builds upon Castle's most popular product family, SIDEWINDER 1:10 SCALE SERIES. Smoother sensorless startups and enhanced drag brake functionality make the SW4 highly versatile, a great stock upgrade in a wide variety of 10th scale vehicles weighing up to 6.5 lbs. ready-to-run. It's the first of its kind to run CRYO-DRIVE™, a combination of hardware and software enhancements to increase thermal performance. COOLER TEMPS mean LONGER RUNS and MORE POWER in your Sidewinder 4 setup. If pro-level performance, American-made quality and an affordable price is what you're looking for, Sidewinder 4 has you covered!	The COPPERHEAD 10 PERFORMANCE 1:10 SCALE ESC is ideal for those who desire higher efficiency and improved optimization for their 10th scale stock upgrade or build. Copperhead 10 will transform R/C vehicles up to 7.5 lbs. ready-to-run, from dull to dangerously fun. Striking in appearance, its straightforward setup and ease of use will have users simply spending more time enjoying their wheel time. A robust hardware design that includes a 6A peak BEC and proprietary software features such as CYRO-DRIVE™ keep the Copperhead cool and free of brownouts. The smooth low end power doesn't miss a beat when you need to leave 'em in the dust!	•
