1:8 AND 1:10 SCALE

*The Sidewinder 8th is a 1:10th and 1:8th scale **BRUSHLESS POWER UPGRADE** that features everything you'll need to toss around buggies, truggies and monster trucks like a rag doll. In fact, anything weighing in at up to 11lbs and running up to 6S LiPo is fair game.*

- The Sidewinder 8th is a **GREAT VALUE** made for entry level, weekend basher, or serious road warriors seeking the benefits of an affordable brushless upgrade. Castle's notorious performance is not diminished in this economic package.
- The ESC is paired with an efficient, smooth canned 2200kv motor with the same internal design as the **AWARD-WINNING** Neu-Castle 1515 1YZ 2200kv.
- Inside the controller is a **BEEFY 8AMP PEAK BEC!** This powerful BEC won't be challenged by today's servos.
- **WATERPROOF** design allows for use in nearly any environment.

"All I can say is fast. Put in a 1/8th lighting stadium that screams up and down the road. Hoping to get it on the track in the next couple weeks!"
- Customer Matthew Atsma

"I installed it in a Slash 4x4 and find it to be a perfect answer to those who think too much power is just right. Very content and would certainly buy again!"
- Customer Dylan Dutka

Input Voltage:	MIN: 2S LiPo; MAX: 6S LiPo (25.2V)	BEC Specification:	5.5V fixed, 8A PEAK
Waterproof:	Yes, but not for use completely submerged	Weight (w/wires):	100 g / 3.5oz.
ESC Cooling Fan:	ESC comes standard, motor cooling fan is sold separately	Size:	2.45" x 2.20" x 1.33"
